DINESHKUMAR N

SENIOR REACT DEVELOPER

+91-9345054217 dineshkumarddk1997@gmail.com

ABOUT ME

Senior React Developer with around 5 years of experience building scalable, responsive web applications using **React.js, JavaScript, TypeScript, Redux Toolkit, React Router, Vite, HTML5, CSS3 and REST APIs**. Experienced in developing enterprise applications, implementing **SSO/RBAC**, **integrating APIs**, optimizing frontend performance, resolving production issues, and building reusable UI components.

PROFESSIONAL EXPERIENCE

Aspire Systems - Senior Engineer **Apr 2025 - Aug 2026**

Projects:

Operational-Tools -Carrier (Jul 2025 - Jun 2026)

- Developed and maintained the Carrier Management Portal using React.js as a microfrontend application supporting carrier-specific order management workflows.
- Implemented Single Sign-On (SSO) and Role-Based Access Control (RBAC) to provide secure authentication and role-specific access to application features.
- Implemented internationalization (i18n) to support language selection and localized user interfaces.
- Integrated REST APIs for carrier offer management, order tracking, and order processing workflows.
- Developed order monitoring and re-initiation features to help users identify and manage failed or stuck orders.
- Implemented role-based user interfaces for offer creation, editing, and approval workflows.
- Monitored API request and response flows across integrated services to troubleshoot issues and support production stability.
- Resolved production issues and improved application reliability, maintainability, and overall user experience.

Sellur Hub (Apr 2025 - Jun 2025)

- Implemented role-based routing and screen-level access control to display modules and features based on user roles, permissions, and access privileges.
- Implemented internationalization (i18n) to enable language selection and provide localized content across application screens.
- Integrated new features and customized application modules based on client-specific, subscription-based, and region-specific business requirements.
- Fixed production issues, optimized application performance, and improved code quality to enhance scalability and maintainability.

Sankara Software Services - Software Engineer **Feb 2024 - Mar 2025**

Projects:

Online Exam Portal (Nextestify) (Aug 2024 - Mar 2025)

- Developed and enhanced AI-driven online examination workflows using React.js, integrating AI-powered question selection through REST APIs and preparing user and developer documentation.
- Developed secure face authentication, live video proctoring, and audio proctoring features to maintain examination integrity and prevent unauthorized activities.
- Developed Node.js and Express.js REST APIs for face authentication using open-source face detection and computer vision libraries.
- Implemented user registration, login, password reset, JWT-based authentication, and cookie-based session management, with secure authentication and authorization middleware.
- Designed and integrated MongoDB for storing and managing user, examination, authentication, and workflow-related data using Node.js and Mongoose.
- Implemented pre-examination system validation, including browser compatibility, internet speed and latency, webcam/microphone availability, and device readiness checks.

- Developed candidate-facing modules for registration, study material tracking, learning coverage analysis, practice tests, certification exams, and examination workflows.
- Integrated and optimized frontend/backend REST APIs, resolved production issues, improved application performance and UI/UX, and collaborated with backend and QA teams to deliver a scalable and reliable examination platform.

CGI (Power Fund) (Feb 2024 - Aug 2024)

- Contributed to the migration of an existing .NET application to React by developing and enhancing frontend modules using React.js and TypeScript.
- Implemented file upload and download functionality by integrating Express.js and Multer to support efficient file handling.
- Performed unit testing, debugging, and production issue resolution to improve application stability, reliability, and code quality.
- Leveraged GitHub Copilot and ChatGPT to accelerate development, improve coding efficiency, and support debugging.
- Conducted research and development on hosting React and Node.js applications on IIS using subdomain-based configurations and documented the deployment process for future reference.

Soft Suave Technologies - Executive Software Engineer **Dec 2021 - Jan 2024**

Projects:

ARMS (Apr 2022 - Jan 2024)

- ARMS (Aviation Resource Management System) contains a crew portal, admin panel, cargo portal, and more. In this project, I have worked in two roles.
- Role 1- Developed the Crew Portal and Admin Panel from scratch using React.js, leveraging the internal UI component library (lai_webui), Redux for state management, and Webpack for module bundling and build configuration.
- Role 2- Developed and maintained JavaScript library specifically for Gantt chart and Data Grid functionalities. To develop this, Used **HTML, CSS, JavaScript, Rollup, Jest, React Testing Library, Linaria**, and more. Created documentation with mdn files and story book.

Snack Magic (Feb 2022 - Mar 2022)

Gamer squad (Dec 2021 - Jan 2022)

ACHIEVEMENTS

Recognized for Exceptional Contribution to Software Quality

Received an appreciation award and bonus for identifying and resolving a critical bug, enhancing CGI application performance and security. Demonstrated strong problem-solving skills, attention to detail, and a proactive approach to software quality improvement.

TECHNICAL SKILLS

- **Frontend:** React.js, JavaScript (ES6+), TypeScript, Redux, Redux Toolkit, React Router, Context API, HTML5, CSS3, SCSS, Bootstrap, Tailwind CSS, Material UI
- **Testing**: Jest, React Testing Library
- **Backend**: Node.js, Express.js, REST APIs
- **Build & Deployment**: Babel,Vite, Webpack, Rollup, NGINX, IIS, Jenkins
- **Visualization:** D3.js, Chart.js, ApexCharts
- **Tools:** Git, GitHub, GitHub Actions, Jira, Storybook

EDUCATION

Bachelor of Engineering - Sri Balaji Chockalingam Engineering College **2016 - 2019**

Diploma - T.P.E.V.R Govt Polytechnic College **2013 - 2016**
